

Cleaning paste

RP

Application

The cleaning paste is a silicone resin paste with great cleaning power, which also removes most stains.

Characteristics

This cleaning paste was developed specifically for the cleaning of insulators of ceramic glass, porcelain, plastics (PTFE, EVA) and metal. The cleaning paste produces an effective protective film on the surface. This silicone resin film has a lasting protection against water and dirt and prevents conductive films of water. The cleaning paste is physiologically harmless and contains no toxic substances or irritants. There are no special measures required during processing.
Do not store below + 10° C. Not suitable for silicon coated isolators.
